PROJECT MANAGER

To support the fast growth and expansion of our Energy Storage Systems (ESS) unit, we are looking for a **Project Manager** located in Hengelo, The Netherlands. The Project Manager will be working together with a multidisciplinary technical team. You will be in direct contact with our customers and suppliers to define the project scope and take responsibility for timely execution of various projects. The Energy Storage Systems will be used for marine, shipping, grid support, solar parks, wind farms and charging infrastructure. Other applications are for example frequency regulation, net balancing, peak shaving and congestion management.

Responsibilities

- Define the project scope, goals and deliverables based on customer's needs.
- Define technical specs according to the customer's needs with the team.
- Manage various projects. You have a key role between customers, suppliers and the technical team. Monitor progress and quality standards.
- Coordinate project activities, identify capacity problems and roadblocks with resource managers.
- Responsible for functional assessment of IT control systems.
- Participate in meetings with customers, suppliers and colleagues, with a customer satisfaction mindset.
- Involvement in cooperation with new and existing suppliers.
- Development of project standards for the growth of the Energy Storage Systems business unit.

Skills and Attitude

- Bachelors' or Masters' degree in a relevant technical direction, for example Industrial Engineering or Electronics.
- Minimum of five years of relevant experience in a similar role.
- Practical experience with Project Management tools.
- Excellent influencing and organizational skills.
- Willing to travel occasionally.
- Hands-on and inspiring team player mentality.
- Excellent English communication skills. Dutch and German are a plus.
