

Super B is a world-class and fast growing producer of unique high-end lithium batteries. Headquartered in The Netherlands with regional organizations in Europe, we supply our batteries to leading OEM's and distributors in the global transport, industrial and energy storage markets.

Super B provides unique starter batteries and these are being used in global leading high performance cars and motorcycles as well as in various industrial applications. Our Intelligent traction and energy batteries enable our customers reliable, independent power supply. They are being used in various applications such as recreational vehicles, energy storage and various vessels.

We have high ambitions in pursuing our goal; to become the leading lithium battery developer and supplier in the world! We are a fast-moving and dynamic company. We continuously seeking for new business opportunities and working hard to expand our production and R&D facilities as well as highly motivated experts to support this unique growth.

A KOOLEN INDUSTRIES COMPANY

SUPPLIER QUALITY ENGINEER

To support our fast growth and expansion, we are looking for a Supplier Quality Engineer located in Hengelo, the Netherlands. You are the person in our company when it comes to quality and you enjoy it to optimize processes. You analyse, maintain processes and make use of quality tools where needed.

Responsibilities

- Support and lead supplier development.
- Quality planning, quality control and quality assurance for parts, assemblies and systems.
- Implement 6 Sigma approach to measure and control supplier quality.
- Responsible for supplier quality requirements. Support Purchasing and Engineering in sourcing decisions, specifications and supplier related requirements.
- Coordinate incoming- and outgoing inspections.
- Responsible for permanent corrective & preventive actions at suppliers. Process supplier related non-conformities.
- Review new designs & drawings, verify manufacturability and verify feasibility of suppliers.
- Set up a quality roadmap to the next level of the organization.
- Implement strategies to reduce total costs of quality.

Skills and Attitude

- **Bachelors' or Masters' degree in a technical education** (for example electronics or mechanics).
- Green Belt (or comparable). Black Belt is a plus.
- **Minimum of 3 years' experience in the field of quality.**
- Experience in a technical / manufacturing environment is a plus.
- Practical experience with quality tools (e.g. 8D).
- Excellent communication skills in Dutch and English. German and French are a plus.
